Forensic Science International, 59 (1993) 189–191
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 59 (1993)

acid phosphatase, cerebral cortical injury, survival time, image quantitative analysis, 19
age determination by teeth, forensic dentistry, archaeology, multiple regression, 137
allele frequencies, DNA-profiling, single locus probes, Caucasian population, frequencies of DNA-profiles, heterozygosity, 119
amphetamine, immunoassay, EMIT, urine, methamphetamine, stereoselectivity, 49
amphetamine, immunoassay, urine, drug testing, methylenedioxyamphetamine, methylenedioxymethamphetamine, 63
analytical toxicology, fast atom bombardment (FAB), high-performance liquid chromatography (HPLC)/mass spectrometry (MS), cefaclor, cephalosporins, capillary HPLC, 71
anti-muscle actin antibody, myocardium, ischemia and reperfusion, arrhythmias, immunocytochemistry, 25
aortic dissection, bloodless, sudden death, cystic medionecrosis, 149
archaeology, forensic dentistry, age determination by teeth, multiple regression, 137
arrhythmias, myocardium, ischemia and reperfusion, anti-muscle actin antibody, immunocytochemistry, 25
autopsy, tranylcypromine, lithium, poisoning, stability, toxicology, 177

bloodless, aortic dissection, sudden death, cystic medionecrosis, 149

capillary HPLC, analytical toxicology, fast atom bombardment (FAB), high-performance liquid chromatography (HPLC)/mass spectrometry (MS), cefaclor, cephalosporins, 71
Caucasian population, DNA-profiling, single locus probes, allele frequencies, frequencies of DNA-profiles, heterozygosity, 119
cefaclor, analytical toxicology, fast atom bombardment (FAB), high-performance liquid chromatography (HPLC)/mass spectrometry (MS), cephalosporins, capillary HPLC, 71
cephalosporins, analytical toxicology, fast atom bombardment (FAB), high-performance liquid chromatography (HPLC)/mass spectrometry (MS), cefaclor, capillary HPLC, 71
cerebral cortical injury, survival time, acid phosphatase, image quantitative analysis, 19
colchicine, reverse-phase HPLC, rats, 15
computer, dot-matrix, impact printers, print-head, matrix design, 35
cystic medionecrosis, aortic dissection, bloodless, sudden death, 149

D1S80 length polymorphism (pMCT 118), DNA, polymerase chain reaction, population data, 131
dating, ESDA, indented impressions, questioned documents, order of writing, 163
discriminant function score, herbicides, paraquat, poisoning, toxicological index, 85
DNA fingerprinting, paternity, multilocus probe, oligonucleotide, statistics, 101
DNA, polymerase chain reaction, D1S80 length polymorphism (pMCT 118), population data, 131
DNA-profiling, single locus probes, Caucasian population, allele frequencies, frequencies of DNA-profiles, heterozygosity, 119
document examination, typed documents, image processing, misalignments, quantitative measurements, printwheels, 89
dot-matrix, impact printers, print-head, computer, matrix design, 35
drug addiction, drug deaths, histologic staining methods, siderophages, narcotic lung, 169
drug deaths, histologic staining methods, siderophages, drug addiction, narcotic lung, 169
drug testing, immunoassay, urine, amphetamine, methylenedioxyamphetamine, methylenedioxymethamphetamine, 63

EMIT, immunoassay, urine, amphetamine, methamphetamine, stereoselectivity, 49

ESDA, indented impressions, questioned documents, dating, order of writing, 163

fast atom bombardment (FAB), analytical toxicology, high-performance liquid chromatography (HPLC)/mass spectrometry (MS), cefaclor, cephalosporins, capillary HPLC, 71
fluorescence, latent fingerprints, laser, ultraviolet photography, 3
forensic dentistry, archaeology, age determination by teeth, multiple regression, 137
frequencies of DNA-profiles, DNA-profiling, single locus probes, Caucasian population, allele frequencies, heterozygosity, 119

herbicides, paraquat, poisoning, toxicological index, discriminant function score, 85
heterozygosity, DNA-profiling, single locus probes, Caucasian population, allele frequencies, frequencies of DNA-profiles, 119
high-performance liquid chromatography (HPLC)/mass spectrometry (MS), analytical toxicology, fast atom bombardment (FAB), cefaclor, cephalosporins, capillary HPLC, 71
histologic staining methods, drug deaths, siderophages, drug addiction, narcotic lung, 169

image processing, document examination, typed documents, misalignments, quantitative measurements, printwheels, 89
image quantitative analysis, cerebral cortical injury, survival time, acid phosphatase, 19
immunoassay, EMIT, urine, amphetamine, methamphetamine, stereoselectivity, 49
immunoassay, urine, drug testing, amphetamine, methylenedioxyamphetamine, methylenedioxymethamphetamine, 63
immunocytochemistry, myocardium, ischemia and reperfusion, arrhythmias, anti-muscle actin antibody, 25
impact printers, dot-matrix, print-head, computer, matrix design, 35
indented impressions, ESDA, questioned documents, dating, order of writing, 163
ischemia and reperfusion, myocardium, arrhythmias, anti-muscle actin antibody, immunocytochemistry, 25

laser, latent fingerprints, fluorescence, ultraviolet photography, 3
latent fingerprints, fluorescence, laser, ultraviolet photography, 3
lithium, tranylcypromine, autopsy, poisoning, stability, toxicology, 177

matrix design, dot-matrix, impact printers, print-head, computer, 35
methamphetamine, immunoassay, EMIT, urine, amphetamine, stereoselectivity, 49
methylenedioxyamphetamine, immunoassay, urine, drug testing, amphetamine, methylenedioxymethamphetamine, 63
methylenedioxymethamphetamine, immunoassay, urine, drug testing, amphetamine, methylenedioxyamphetamine, 63
misalignments, document examination, typed documents, image processing, quantitative measurements, printwheels, 89
multilocus probe, DNA fingerprinting, paternity, oligonucleotide, statistics, 101
multiple regression, forensic dentistry, archaeology, age determination by teeth, 137
murder, psychosocial, Nigeria, 157
myocardium, ischemia and reperfusion, arrhythmias, anti-muscle actin antibody, immunocytochemistry, 25

narcotic lung, drug deaths, histologic staining methods, siderophages, drug addiction, 169
Nigeria, psychosocial, murder, 157

oligonucleotide, DNA fingerprinting, paternity, multilocus probe, statistics, 101
order of writing, ESDA, indented impressions, questioned documents, dating, 163

paraquat, herbicides, poisoning, toxicological index, discriminant function score, 85
paternity, DNA fingerprinting, multilocus probe, oligonucleotide, statistics, 101
poisoning, herbicides, paraquat, toxicological index, discriminant function score, 85
poisoning, tranylcypromine, lithium, autopsy, stability, toxicology, 177
polymerase chain reaction, DNA, D1S80 length polymorphism (pMCT 118), population data, 131
population data, DNA, polymerase chain reaction, D1S80 length polymorphism (pMCT 118), 131
print-head, dot-matrix, impact printers, computer, matrix design, 35
printwheels, document examination, typed documents, image processing, misalignments, quantitative measurements, 89
psychosocial, murder, Nigeria, 157

quantitative measurements, document examination, typed documents, image processing, misalignments, printwheels, 89
questioned documents, ESDA, indented impressions, dating, order of writing, 163

rats, colchicine, reverse-phase HPLC, 15
reverse-phase HPLC, colchicine, rats, 15

siderophages, drug deaths, histologic staining methods, drug addiction, narcotic lung, 169
single locus probes, DNA-profiling, Caucasian population, allele frequencies, frequencies of DNA-profiles, heterozygosity, 119
stability, tranylcypromine, lithium, autopsy, poisoning, toxicology, 177
statistics, DNA fingerprinting, paternity, multilocus probe, oligonucleotide, 101
stereoselectivity, immunoassay, EMIT, urine, amphetamine, methamphetamine, 49
sudden death, aortic dissection, bloodless, cystic medionecrosis, 149
survival time, cerebral cortical injury, acid phosphatase, image quantitative analysis, 19

toxicological index, herbicides, paraquat, poisoning, discriminant function score, 85

toxicology, tranylcypromine, lithium, autopsy, poisoning, stability, 177
tranylcypromine, lithium, autopsy, poisoning, stability, toxicology, 177
typed documents, document examination, image processing, misalignments, quantitative measurements, printwheels, 89

ultraviolet photography, latent fingerprints, fluorescence, laser, 3
urine, immunoassay, drug testing, amphetamine, methylenedioxyamphetamine, methylenedioxymethamphetamine, 63
urine, immunoassay, EMIT, amphetamine, methamphetamine, stereoselectivity, 49
